

R E M A R K S

The preliminary amendment of the Specification, Abstract and claims is respectfully requested to place this application in a U.S. format.

A clean copy of the Specification is appended for the convenience of the U.S. Patent Office.

The foregoing amendments to the Specification and claims are fully supported by the Specification and claims as filed and do not add new matter. The new claims are similarly supported by the Specification and original claims as filed and do not add new matter. More particularly support for independent new claims 16 and 17 is found in the original claims and Specification as filed.

The corrections to the Specification are a matter of obvious clerical error and the additions to the Specification are from the claims as filed to incorporate the subject matter of the original filed claim into the Specification instead of incorporating the Specification into the claims. The addition of headings to the Specification is consistent with the suggested format described in 37 C.F.R. § 1.77(b) and MPEP § 608.01(a).

KLAUS ZUCHOLL et al.
U.S. Appl. S.N. 10/849,030

It is believed all the claims are now in a U.S. format and are patentable, which action is respectfully requested.

Respectfully submitted,

BRENEMAN & GEORGES
